In recent years, every day citizens have had an increasing amount of opportunities to actively participate, contribute and decide in different areas and contexts. Although these opportunities are still emerging, the manufacturing industry is no exception to this paradigm.

The objective of the online event – The Social Manufacturing Paradigm: co-creating with manufacturers, makerspaces and consumers – is to highlight the role of makers and consumers in the social manufacturing landscape, which promotes the participation among individuals and the industry in the production of consumer goods.

This framework will be made based on the activities being carried out within the iPRODUCE project. The presentations will focus on highlighting the main requirements and challenges faced by consumers and the industry and technologies that are available to facilitate a collaborative manufacturing environment. Invited speakers will showcase ongoing work and existing practices within the domain of social manufacturing. Finally, a virtual round table will provide the audience with an opportunity to engage in and manufacture a fruitful and interactive discussion.

Preliminary agenda:

09h30 | Virtual hello and welcome

09h45 | Introduction of iPRODUCE

10h00 | The social manufacturing paradigm: needs, practices and tools

10h30 | Keynote 01

11h00 | Break

11h15 | Keynote 02

11h45 | Presentations from iPRODUCE collaborations

12h15 | Virtual round table

12h45 | Wrap up and end of event
